Easy to operate, a single control is used to slide the opaque and translucent woven stripes past each other. The same operation is used to raise or lower the window blind to any height in the window with ease, in the same way the classic roller blind.

The front layer moves independently of the back allowing the stripes to glide between each other creating an open and closed effect, with limitless light control.

Sliding the fabric into a closed 'opaque-opaque' position allows full privacy and an impressive block of beautiful fabric at your window, whilst the 'translucent-opaque' position creates a stunning striped statement.

The Vision blind combines the ideal balance of privacy and light control with the fashionable, eye-catching trend of bold stripes and colour blocking.

Vision is a stylish fabric that gently filters & softens daylight whilst also offering you the option of a privacy blind, controlling the light while maintaining the view.

With a Vision blind you will enjoy the very best in quality, manufacture and design, along with the practicality of a low maintenance window blind.

The exceptional Vision fabric range features sheer metallics, delicate subtle tones and natural wood weave effects, the perfect collection for any room in the home.
